

Updating a ComposicaD USB

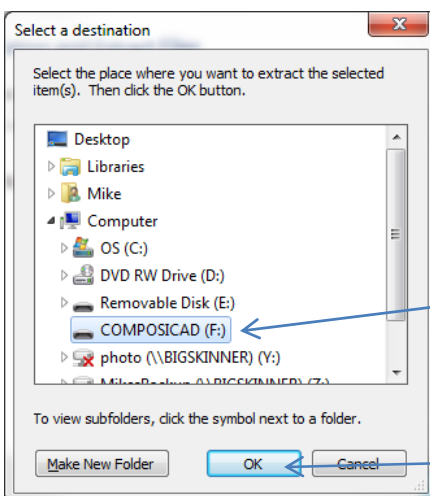

Download the latest complete User version of ComposicaD Metal and the latest Help for ComposicaD Metal from the ComposicaD web site: <http://composicad.com/UserZoneLogin.php> . Use the user name and password that was emailed to you. You should have two files named ComposicaDm_Vx.x.x.zip and ComposicaDm_Help_Vx.x.x.zip – where Vx.x.x is the current version number.

Unzip (Extract) the downloaded files to the USB thumb drive. Right click on the ComposicaDm_Vx.x.x.zip file and select “Extract All...” You will get a menu asking for the destination directory.

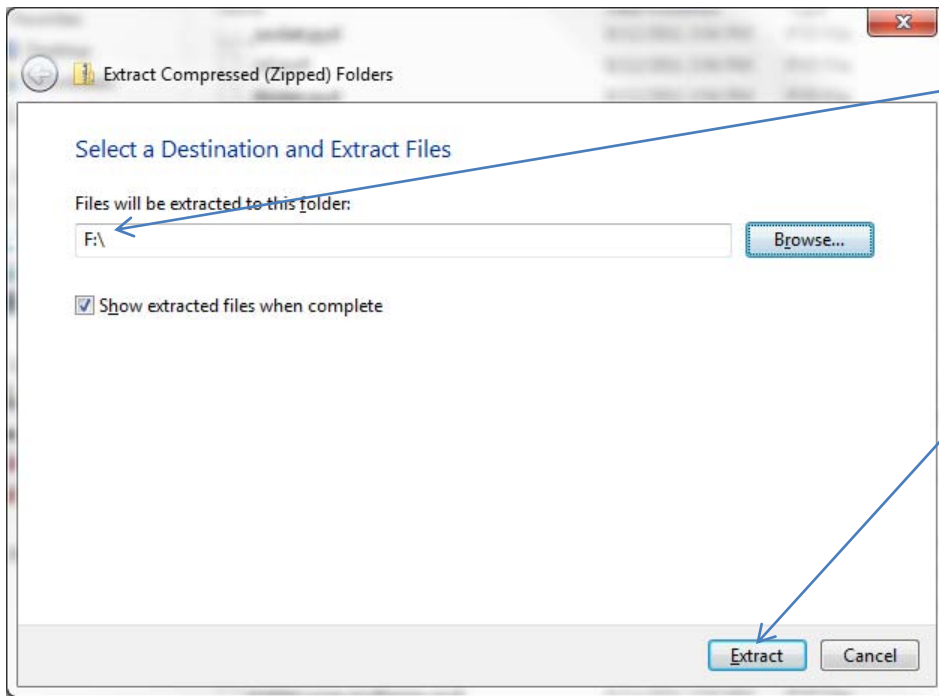

Use Browse button to find the COMPOSICAD usb drive

Use the Browse button to select the thumb drive (named COMPOSICAD) the drive letter may vary:

Find and select the Drive named COMPOSICAD – the drive letter may vary (this is the USB drive)

Click OK

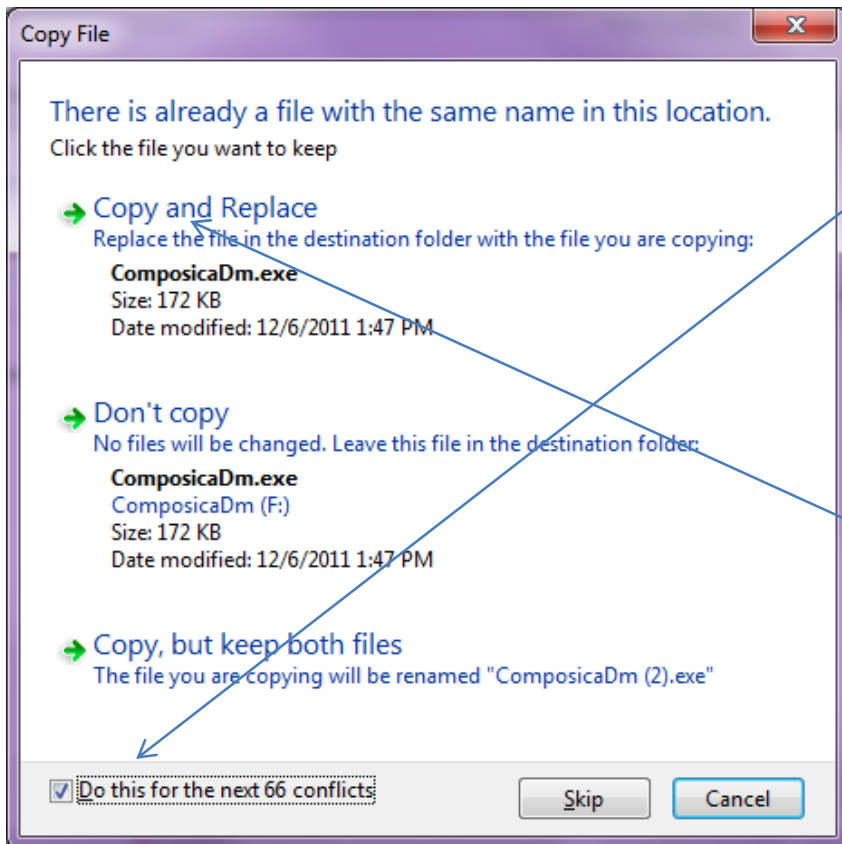

This should now be the drive letter of the USB (may be different than F:)

Click Extract to extract the files

Hit Extract to unzip the files into the root directory of the USB thumb drive. The drive letter may be different than shown above.

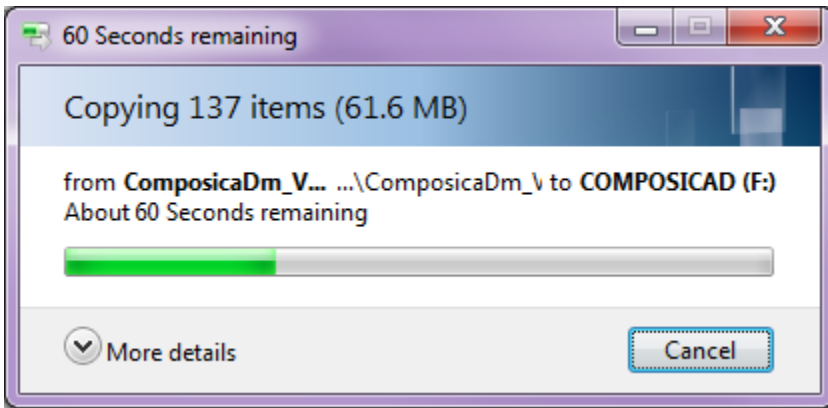

A window will pop up saying "There is already a file with the same name...":

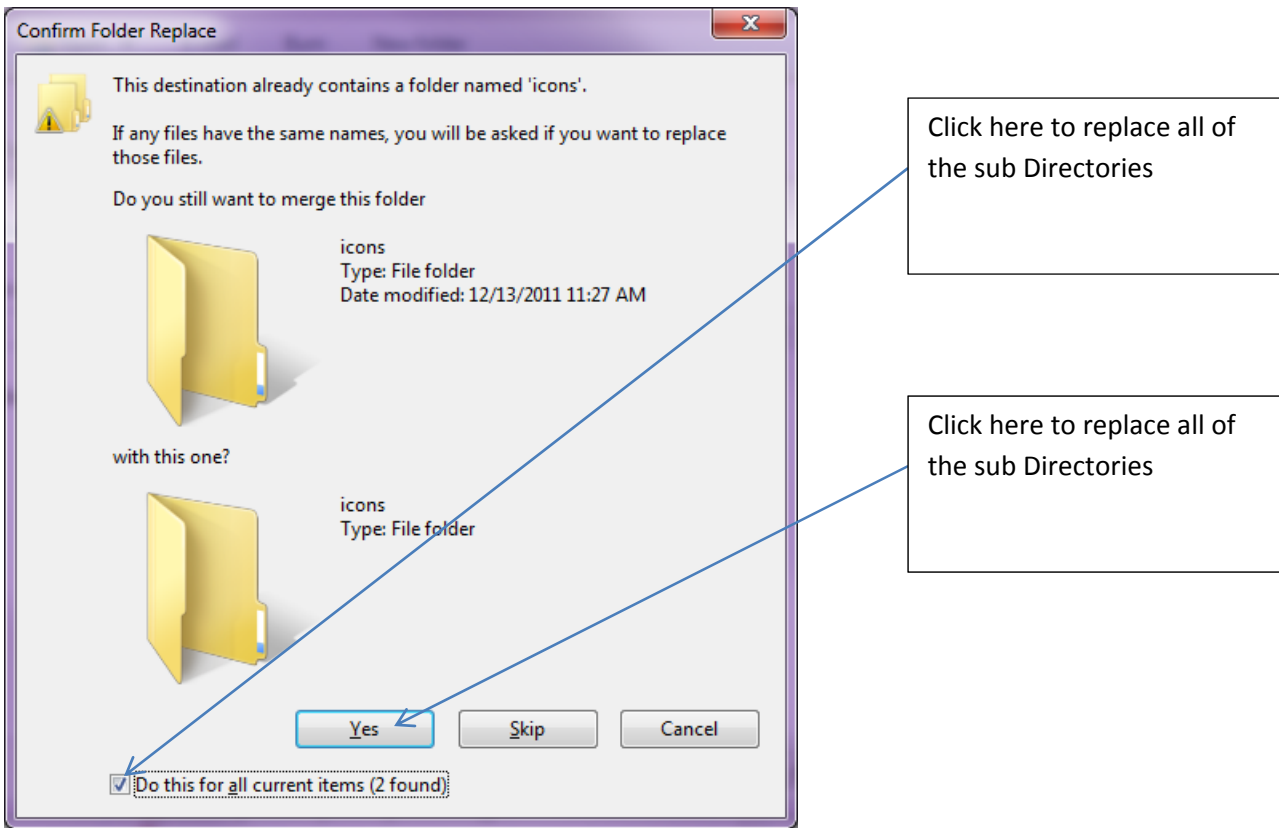

Click here to replace all of the files

Then Click here to replace all existing files

A window showing copy information will pop up:

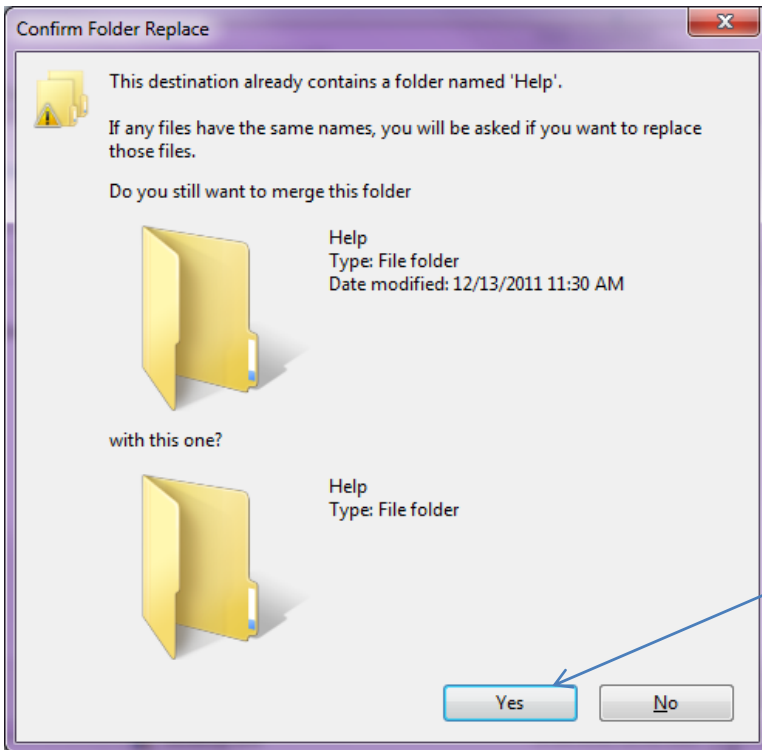

Wait... A window asking to confirm folder replacement will pop up:

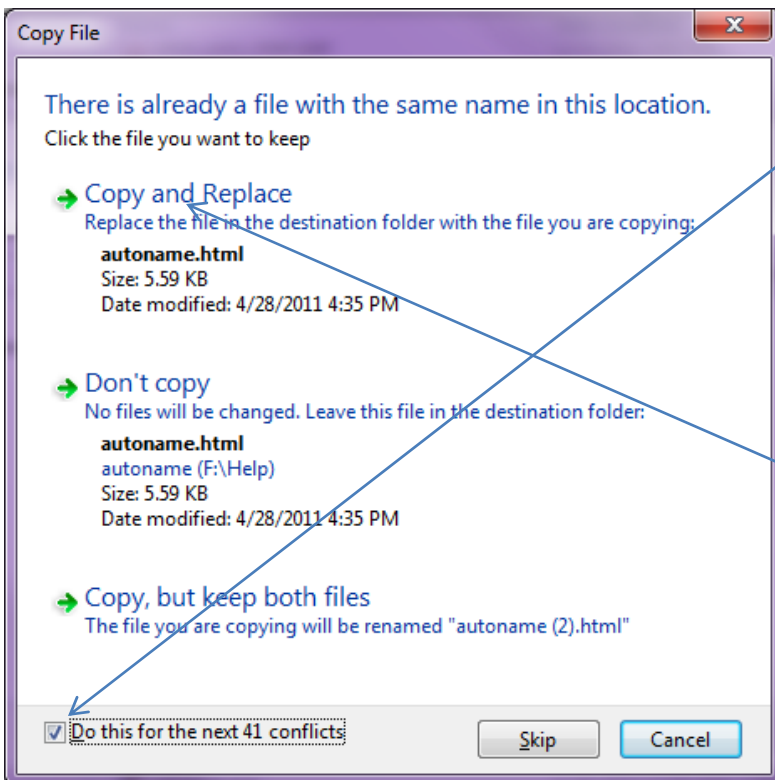

Now do the same thing for the Help files from the ComposicaDm_Help_Vx.x.x.zip file. Select the help file and use "Extract all..." from the right click menu. Follow the same procedure to select the USB drive as the Destination as you did before.

When the replace folder screen appears click Yes:

Click here to replace existing Help folder

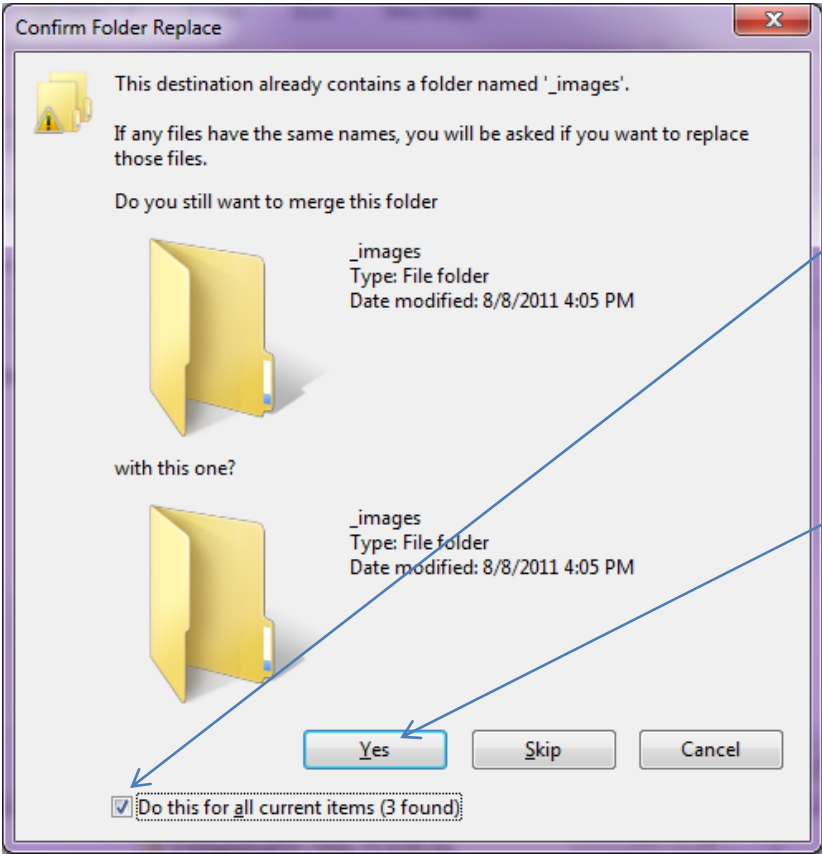

When the window that says "There is already a file with the same name..." appears click the "Do this for the next xx conflicts" and then click "Copy and Replace":

Click here to replace all of the files

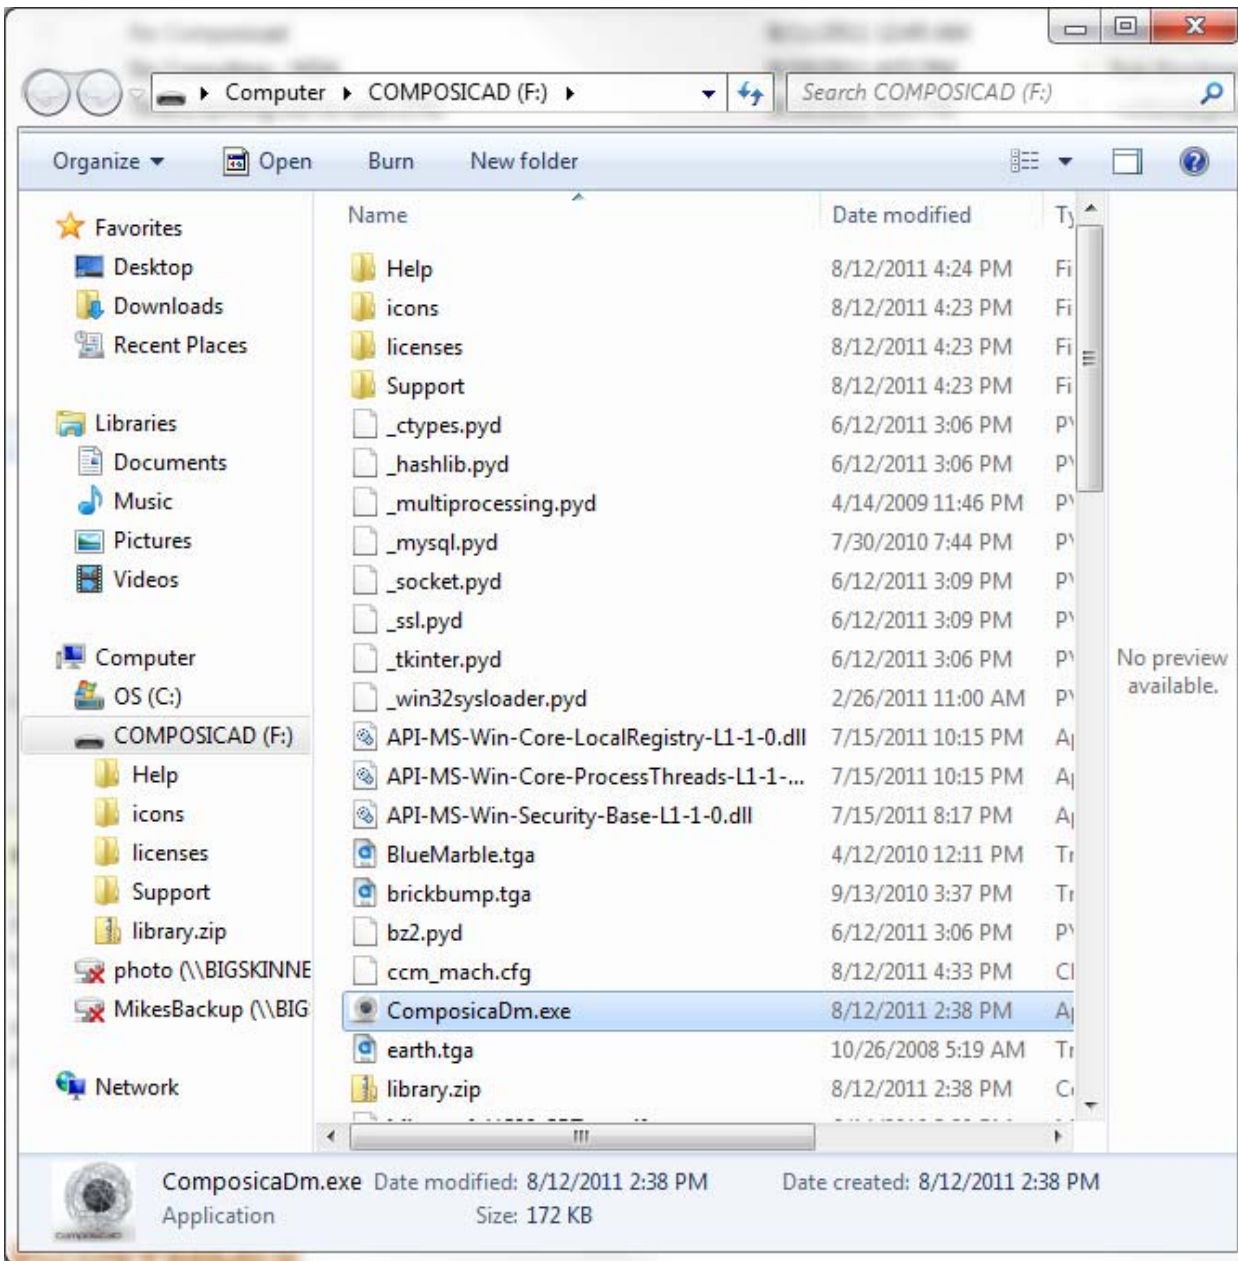

Then Click here to replace all existing files

When the "Confirm folder replace" window comes up Check the "Do this for all current items" box and then click "Yes":

Click here to replace all of the sub Directories

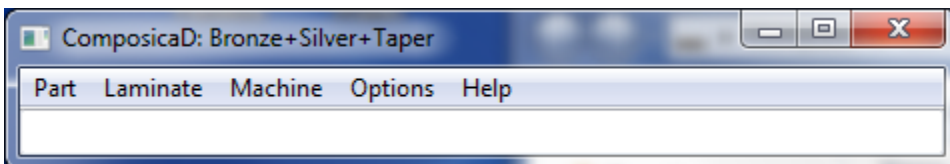

Click here to replace all of the sub Directories

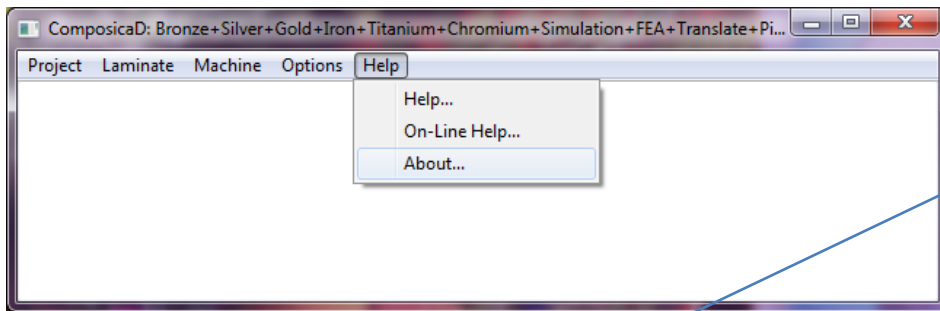

Run the CompositicaDm.exe (application) file by doubling clicking on the file name or icon.

You will see the Compositcad logo for several seconds

The main menu bar should appear:

Compositcad should be ready to run. Use the Help About menu to see the current version:

Installed modules and options will show here

Current version will show here
